

# Who

The problem affects students and their parents.

# What

The boundary of the problem is student segment.  
The Issue arises when the student doesn't know the cutoff to enter his/her dream university.

# When

The Problem arises when the student decides his college for Undergrad or Post Graduation

# Where

The problem is widespread in areas where there is lack of knowledge about college admission process.

# Why

The problem needed to be fixed when the student has no specific target and lacks focus due to insufficient knowledge about cutoff criteria.

Root Cause: **No Proper tool to analyse how much scores are needed to get accepted into specified university ranges.**

# PROBLEM STATEMENT

The students or parents require a way to analyse and list the universities available for their cut-off mark so that the student or parent will be directly benefitted by preparing themselves in par with the university's requirement.
